EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Richard F. Jaworski on 10/11/05.

The application has been amended as follows:

In claim 10 line 7, after "connectors" insert --at least one of the plurality of electrode connectors being positioned between a first and a distal end of the cable--.

In claim 19 line 10, after "electrodes" insert --at least one of the plurality of electrodes being positioned between a first and a distal end of the cable--.

In claim 20 line 10, after "connectors" insert --at least one of the plurality of electrode connectors being positioned between a first and a distal end of the cable--.

In claim 21 line 7, after "electrodes" (second occurrence) insert --at least one of the plurality of electrodes being positioned between a first and a distal end of the cable--.

In claim 39 line 4, after "wires" insert --, each wire extending substantially an entire length of the cable--. In line 10, after "electrodes" insert --at least one of the plurality of electrodes being positioned between the end and a distal end of the cable--.

In claim 40 line 2, after "cables" insert --, each of the plurality of respective cables including a plurality of individual wires, each wire extending substantially an entire length of the cable--. In line 10, after "connectors" insert --at least one of the plurality of electrode connectors being positioned between the end and a distal end of the cable--.

The following is an examiner's statement of reasons for allowance: the prior art fails to teach or suggest a monitoring cable having a plurality of individual wires extending substantially the entire length of the cable, and a plurality of electrodes / electrode connectors connected to a respective wire and being electrically isolated from each other, wherein at least one of the plurality of electrode/ electrode connector is positioned between the two ends of the cable, in combination with the remaining limitations of the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Felix O. Figueroa whose telephone number is (571) 272-2003. The examiner can normally be reached on Mon.-Fri., 10:00am-6:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Paula A. Bradley can be reached on (571) 272-2800 Ext. 33. The fax phone
